

Classrooms Around The World

activity sheet

Classrooms in other countries may look very different to **your classroom.**

LOOK around your classroom and then LOOK at this picture of a classroom in a developing country.

What are the differences? Take some time to find both the similarities and differences.

Uganda

This is a typical classroom in Uganda. They have plenty of large windows to let in the light so they can see the blackboard because they don't have electricity in the buildings. There are a lot of students squeezed in to this room! Notice the cups and plates on the window sill? The students bring their own cups because the school provides a maize flour porridge for breakfast at 11am.

If you were given some money to make 1 change to this classroom, what would it be? You can write about this, or draw, or 'show' in some other way the change you would make for these children.

The money would be used for _____

I chose to spend the money in this way because _____

Just One Day challenges students to live simply for one day to make a difference in the world.
